De Guzman, Aileen Erica P.

BSIE 1-5N

Problem: My class is done for this week so my problem is how can I go home early.

```
                    ( Start )
                        |
                        v
              / To go home early /
                        |
                        v
          [ Locate some bus station
                  in Cubao ]
                        |
                        v
   Y          < Look if theres            N      [ Go inside the bus
  <----          many              ---------->      and wait until the
                 passenger in                       bus stop in your
                 the bus station >                  destination ]
                                                          |
                                                          v
                                                    [    End    ]
```

STEP 1: Locate some bus station in Cubao

STEP 2: Look if there's many passenger in the bus station

If yes: Go to step 1

If no

STEP 3: Go inside the bus and wait until the bus stop in your destination

Input: To go home early

Process: Locate some bus station

Output: I'm home
